Figure 4. Product Information

Active Interface Wiring :   24V NO GND
Passive Interface Wiring :   24V NO GND

Active Signal DC 24V Input，All 1-8 Channels Activated，
Passive Normally Open Input, NO and GND Shorted,
All 1-8 Channels Activated
(When Exiting Fire Mode, all 1-8 Channels will turn off.)
Note: In Fire Mode, the software and manual buttons cannot operate the device.

Product Overview

The 8 CH 20A Relay Switch Module (see Figure 1) serves as a system switch execution unit, typically installed in a distribution box, rail-mounted, occupying 8P module units. It provides 8 channels of 20A relay switching, using magnetic latching relays. The module features a built-in mechanical forced cut-off switch, enabling relay operation even during system crashes or power outages.Each circuit can independently control the switching of 4400W lighting fixtures.Controls lighting on/off, DC/AC equipment power switching, dry contact opening/closing, and high/low-voltage curtain operation.Supports YC-BUS /RS485 control.

Function Description

- Standard 35mm DIN rail installation: Occupies 8P module units.
- Equipped with Fanhua single contact magnetic latching relay, providing 8-channel 20A relay switching.
- Each circuit can independently control devices up to 4400W.
- Supports setting the initial power-on state for each circuit (on, off, or previous power state).
- Features sequential delay startup for multiple circuits to prevent power grid surges from simultaneous startup.
- Includes two interlock modes for controlling four sets of curtains.
- Includes one interlock mode for controlling the low, medium, and high-speed settings of two central air conditioners.
- Returns the actual switch status of each circuit to the monitoring center immediately after executing scene commands.
- Built-in mechanical forced cut-off switch function, allowing relay switching even during network failure or power outage.
- Includes a fire protection interface with one normally open passive and one active 24V connection.
- Supports online firmware updates and Bus network disconnection alarm function.
- Supports RS485/YC-BUS communication.

Precautions

- Use CAT5E or RVV4*0.75 four-core wire for bus wiring.
- After installation, check all connections to ensure they are correctly connected.
- The current for each output circuit must not exceed 20A.
- To protect the equipment and load, it is recommended to connect a 20A circuit breaker for each circuit.

Product Information

Product Dimensions: See Figures 2 and 3
Product Wiring: See Figure 8
Product Information: See Figure 4
1. Relay Output Wiring Terminals: Use a one-in-one-out method; the hole diameter can accommodate 4 square mm wire.
2. LED Indicators:
- Power : Power indicator light.
- Bus: Network indicator light; steady on indicates normal network connection, slow blinking indicates abnormal network connection.
3. Function Keys:
- Forced Cut-off Switch (See Figure 13): A-H corresponds to channels 1-8. Use a small flathead screwdriver to toggle the switch up and down in the groove.
4. Bus Interface: 24V, G, A, B.
5. Setting Address:
- (See Figures 6-7) Refer to the address setting dip switch table to set the dip switch to the corresponding address.
6. Fire Interface:
- Fire Center: Provides a normally closed signal to engage all 8 circuits; provides a normally open signal to disconnect all 8 circuits, with priority over software and manual control (see Figure 5).

Product Installation

See Figures 9-12
- Step 1. Secure the 35mm rail with screws.
- Step 2. Remove the snap-on cover from the 8CH 20A Relay Switch Module.
- Step 3. Press the entire module onto the rail and slide it until it is in the correct position, then snap the cover into place.

Safety Warning ⚠ WARNING

- Each relay circuit requires a suitable circuit breaker or fuse.
- Tightening torque should not exceed 0.4 Nm.
- Input power wire: Max 4mm²; Load wire: Max 1mm².
- Installation location: Distribution box.
- Do not connect the YC-BUS interface incorrectly, as it may damage the equipment.
- The YC-BUS interface must not be connected to AC power; otherwise, it will damage all devices on the bus.
- Ensure a good ventilation environment.
- Do not expose to rain, contact with other liquids, or corrosive gases.

Packing List

Technical Parameters

Basic Parameters

|	
Operating Voltage	24VDC±10%
Maximum Power Consumption	≤4.8W
Rated Voltage	250/400VAC
Output Circuit	8-channel relay
Relay	Fanhua single-contact magnetic latching relays
Rated Current	20A (single channel),Surge current capability: 500A/2ms (single channel)
Switching Cycles	no-load: 1,000,000 cycles , load: 30,000 cycles
Protection	circuit breaker for each circuit

External Environment

Operating Temperature	-5℃~45℃
Operating Relative Humidity	≤90%
Storage Temperature	-20℃~60℃
Storage Relative Humidity	≤93%

Product Specifications

Dimensions (L*W*H)	144 mm*98 mm*68 mm
Net Weight	≤540 g/pcs
Enclosure Material	flame retardantPP
Installation Method	standard 35mm DIN rail mounting **(see Figure 9-12)**
Protection Level	IP20
