## **Product Overview**

2 CH 10A Thyristor Dimming Module (see Figure 1), serve as a system dimmer execution unit, typically installed in a distribution box. It is used to control halogen lamps, incandescent lamp, fluorescent lamp, LED light and shade adjustment, switch function.

## **Function Description**

- Standard 35mm DIN rail installation: Occupies 12P module units.
- Adopt leading edge TRIAC dimmer, provide 2 CH 10A leading edge dimmer.
- The total power of 2 channels is 3600W, single channel can independently control 2200W dimmer lamps
- Supports setting the initial power-on state for each circuit (on, off, or previous power state).
- With relay protection, multiple temperature protection, over temperature automatic protection function.
  Returns the actual dimmer status of each circuit to the monitoring center immediately after executing scene commands
- Dimmer accuracy 10000 level, 2 dimmer curves can be set, matching different types of lamps.
- With local and remote programming and testing functions.
- Equipped with manual buttons, circuit, and operation status indicators for convenient local maintenance.
- Includes a fire protection interface with one normally open passive and one active 24V connection.
- Supports online firmware updates and Bus network disconnection alarm function.
- Supports RS485/YC-BUS communication.

## **Precautions**

- Use CAT5E or RVV4\*0.75 four-core wire for bus wiring.
- Do not connect the AB signal of the bus interface incorrectly, otherwise the bus signal will be abnormal.
- The current of each output circuit must not exceed 10A, and the total power of circuits must not exceed 3600W.
- To protect the equipment and load, it is recommended to connect a 16A circuit breaker for each circuit.

# **Product Information**

Product Dimensions: See Figures 2 and 3

Product Wiring: See Figure 9 Product Information: See Figure 4

- 1. Dimmer output terminal: 1-2 circuit, aperture can be connected to 4 square mm wire.
- 2. Dimmer input terminal: AC220V input, with ground terminal, aperture can be connected to 4 square mm wires.
- 3. LED indicator light and digital tube
- Power : Power indicator light.
- Bus: Network indicator light; steady on indicates normal network connection, slow blinking indicates abnormal network connection. The color is yellow.
- Digital tube: Used for address display, address setting display, dimmer brightness status display.
- 4. Function Keys:
- CHANNAI SELECT key : Dimmer channel status query, short press to switch dimmer channel (see Figure 5);
- ID SET key : Address setting 01-63, setting method (see Figure 6).
- 5. Brightness adjustment key and status indicator:
- On key : Short press to start the 5s gradual brightness to 100%, long press the brightness value gradually increases.
- Off key : Short press to turn off the 5s gradual brightness to 0%, long press the brightness value gradually decreasing.
- Status indicator: : Dimmer value ≥1, the status indicator is green, less than 1 status indicator off (see Figure 7).
- 6. Bus interface (YC-BUS) : 24V, G, A, B, no input, left in right out, right in left out.
- 7. Fire interface: (see Figure 8)

## **Product Installation**

See Figures 10-12

- Step 1. Secure the 35mm rail with screws.
- Step 2. Hold the 2 CH 10A Thyristor Dimming Module at a 45 degree angle with both hands, and the bottom of the module is clamped against the guide rail. The whole module is pressed to the guide rail at a 90 degree angle, and the module is slid until it is in the correct position.

# Safety Warning

- Each dimmer circuit requires a suitable circuit breaker or fuse.
- Tightening torque should not exceed 0.4 Nm.
- Input power wire: Max 4mm<sup>2</sup>; Load wire: Max 1mm<sup>2</sup>.
- Installation location: Distribution box.
- Do not connect the YC-BUS interface incorrectly, as it may damage the equipment.
- The YC-BUS interface must not be connected to AC power; otherwise, it will damage all devices on the bus.
- Ensure a good ventilation environment.
- Do not expose to rain, contact with other liquids, or corrosive gases.

### **Packing List**

YC-DM.02.10B\*1/User Manual\*1/Certificate of Conformity\*1

# **Technical Parameters**

### Basic Parameters

Basic Parameters	
Operating Voltage	24VDC±10%
Maximum Power Consumption	≤1.5W
Input Voltage	AC 220~250V(50/60Hz)
Output Circuit	2 CH leading edge dimmer.
Rated Current	10A(single channel), 2 channels total power 3600
Bus Interface	bus interface*2
Load Type	Incandescent lamp, halogen lamp, incandescent lamp, front phase control electronic transformer, etc
Protection	circuit breaker for each circuit
External Environment	
Operating Temperature	-5°C~45°C
Operating Relative Humidity	≤90%
Storage Temperature	-20°C~60°C
Storage Relative Humidity	≤93%
Product Specifications	
Dimensions ( L*W*H )	216 mm*102 mm*68 mm
Net Weight	≤1182 g/pcs
Enclosure Material	brushed aluminum shell technology
Installation Method	standard 35mm DIN rail mounting
	(see Figure 10-12)
Protection Level	NONE

#### System Diagram

Notebook

# **Bus Specification**

Bus interface	4-core wire : RVV4*0.75	UTP : CAT5/CAT5E
24V	RED	BROWN WHITE/BROWN
GND	BLACK	BLUE WHITE/BLUE
А	YELLOW	ORANGE WHITE/GREEN WHITE
В	GREEN	ORANGE/GREEN

### **Technical support**

Service Hotline: 86-18029750069

working hours: 9:00-12:00,13:00-18:00,From Monday to Friday)
