YC-RL.04.20B
4 CH 20A Relay Switch Module (With Current Detection)

Product Manual

Release : September 22, 2022
Version : V1.5

Firgue1.4 CH 20A Relay Switch Module
(With Current Detection)
L:72mm   H:68mm

W:102mm

Figure 4. Product Information

Active Interface Wiring :   24V NO GND   Passive Interface Wiring :   24V NO GND

Active Signal DC 24V Input，All 1-4 Channels Activated，
Passive Normally Open Input, NO and GND Shorted,
All 1-4 Channels Activated
(When Exiting Fire Mode, all 1-4 Channels will turn off.)
Note: In Fire Mode, the software and manual buttons cannot operate the device.

Figure 5. Fire Interface Description

Address Configuration
Values range from 01-63, with the algorithm shown in the following figure

1 $(2^0)(2^1)(2^2)(2^3)(2^4)(2^5)$
0 0 0 0 0 0 0
   1 2 3 4 5 6

DIP switch settings

Reserved, note: Cannot be set to the ON position

Product Overview

The 4 CH 20A Relay Switch Module (With Current Detection) (see Figure 1) serves as a system switch execution unit, typically installed in a distribution box. It can control the switching of lights, the on/off state of devices, the on/off state of passive dry contacts, the opening and closing of strong or weak current curtains, the hot/cold valve of water-cooled air conditioning, and the switching between high/medium/low fan speeds.

Function Description

- Standard 35mm DIN rail installation: Occupies 4P module units.
- Equipped with Fanhua single contact magnetic latching relay, providing 4-channel 20 A relay switching.
- Each circuit can independently control devices up to 4400W.
- Supports setting the initial power-on state for each circuit (on, off, or previous power state).
- Features sequential delay startup for multiple circuits to prevent power grid surges from simultaneous startup.
- Support current mA/ voltage V/ power W instantaneous detection, power can be accumulated detection unit Kw.h
- Returns the actual switch status of each circuit to the monitoring center immediately after executing scene commands.
- Equipped with mechanical strong cut off function, equipment networking failure or power off,the relay can also turn on and off.
- Includes a fire protection interface with one normally open passive and one active 24V connection.
- Supports online firmware updates and Bus network disconnection alarm function.
- Supports RS485/YC-BUS communication.

Precautions

- Use CAT5E or RVV4*0.75 four-core wire for bus wiring.
- After installation, check all connections to ensure they are correctly connected.
- The current for each output circuit must not exceed 20A.
- To protect the equipment and load, it is recommended to connect a 20A circuit breaker for each circuit.

Product Information

Product Dimensions: See Figures 2 and 3
Product Wiring: See Figure 8
Product Information: See Figure 4
1. Relay Output Wiring Terminals: Use a one-in-one-out method; the hole diameter can accommodate 4 square mm wire.
2. LED Indicators:
- Power : Power indicator light.
- Bus: Network indicator light; steady on indicates normal network connection, slow blinking indicates abnormal network connection.
- Function Keys: Forced Cut-off Switch (See Figure 13): A-D corresponds to channels 1-4. Use a small flathead screwdriver to toggle the switch up and down in the groove.
3. Bus Interface: 24V, G, A, B.
4. Setting Address:
- Step 1: (See Figure 8) Remove the latch cover; it requires some force to pull it out.
- Step 2: (See Figures 6-7) Refer to the address setting dip switch table to set the dip switch to the corresponding address.
- Step 3: After setting the address, remember to replace the latch cover.
5. Fire Interface:(see Figure 5).
   Note: The module has a built-in induction coil to detect the instantaneous current of 1-4 circuits.

Product Installation

See Figures 9-12
- Step 1. Secure the 35mm rail with screws.
- Step 2. Remove the snap-on cover from the 4 CH 20A Relay Switch Module (With Current Detection).
- Step 3. Press the entire module onto the rail and slide it until it is in the correct position, then snap the cover into place.

Safety Warning ⚠ WARNING

- Each relay circuit requires a suitable circuit breaker or fuse.
- Tightening torque should not exceed 0.4 Nm.
- Input power wire: Max 4mm²; Load wire: Max 1mm².
- Installation location: Distribution box.
- Do not connect the YC-BUS interface incorrectly, as it may damage the equipment.
- The YC-BUS interface must not be connected to AC power; otherwise, it will damage all devices on the bus.
- Ensure a good ventilation environment.
- Do not expose to rain, contact with other liquids, or corrosive gases.

Packing List

Technical Parameters

Basic Parameters

Operating Voltage	24VDC±10%
Maximum Power Consumption	≤3.2W
Rated Voltage	250/400VAC
Output Circuit	4-channel relay (built-in mutual inductance coil, accuracy 0.1A)
Relay	Fanhua single-contact magnetic latching relays
Rated Current	20A (single channel),Surge current capability: 500A/2ms (single channel)
Switching Cycles	no-load: 1,000,000 cycles , load: 30,000 cycles
Protection	circuit breaker for each circuit

External Environment

Operating Temperature	-5˚C~45˚C
Operating Relative Humidity	≤90%
Storage Temperature	-20˚C~60˚C
Storage Relative Humidity	≤93%

Product Specifications

|	
Dimensions (L*W*H)	72 mm*102 mm*68 mm
Net Weight	≤316 g/pcs
Enclosure Material	flame retardantPP
Installation Method	standard 35mm DIN rail mounting **(see Figure 9-12)**
Protection Level	IP20
